EDUCATION

- **Dalhousie University** Halifax, CA
Master of Applied Computer Science; GPA: 3.9 *Jan. 2021 – Aug. 2022*
- **Gujarat Technological University** Ahmedabad, India
Bachelor of Engineering in Computer Engineering; GPA: 3.92 (9.34/10.0) *Aug. 2016 – Aug. 2020*

PROGRAMMING SKILLS

Languages: Python, Java, JavaScript, GO, Solidity

Blockchain: Hyperledger Fabric, ERC-20, Remix, MetaMask, Ganache, Truffle.js

Artificial Intelligence: TensorFlow, TFLearn, Keras, PyTorch, Scikit Learn

Cloud Technologies: AWS, GCP, Azure, Docker, Kubernetes, Heroku, CI/CD Pipelines

Frameworks: React.js, Vue.js, Django, Flask, Spring

Tools & DB: GIT, JIRA, Postman, MongoDB, MySQL, DynamoDB

EXPERIENCE

- **Royal Bank of Canada** Toronto, Canada
Lead Full Stack Developer - Enterprise Architect *Nov 2022 - Present*
 - **Logging as a Service (Laas):** Extensive work on platform portability and decoupling from third-party vendors. Leveraging Open Telemetry to implement open standards for Logging across the institution for better management and functioning.
- **HealthCard** Halifax, Canada
Blockchain Architect *March 2022 - Nov 2022*
 - **Verification Engine:** Developing documents verification system with Hyperledger Fabric and Solidity contracts. All the manual document verification would be handled by a blockchain engine working on AI Algorithms
 - **Reward Functions:** Reconstructing reward function to cater with Ethereum tokens over the main network. Developed a specific equation that would accordingly dictate the amount of tokens allocated to every user
 - **Containerized Application:** Shifting the monolithic architecture to Kubernetes containerized application transforming it to micro-service architecture.
- **Canada Revenue Agency** Ottawa, Canada
Software Developer Intern *May 2022 - Nov 2022*
 - **Secure Portal Re-engineering:** Migrating CRA website from Struts version to Angular version for upgrading. Worked with multiple backend APIs and data flows.
 - **Accessibility Issues:** Solving accessibility bugs for specially-abled users. Worked on the Quartz library which is used for the development of every component within the application
- **Dalhousie University** Halifax, Canada
Research & Teaching Assistant *Sept. 2021 - Aug. 2022*
 - **Advance Topics in Cloud Computing:** Delivered lab for grad students and guided and evaluated the projects
 - **Research:** Worked on Algorithm and code for tracing table generation of given code. The project's objective is to help new students in computer science to visualize the flow of the code. Developed using Python and HTML
- **CryptoVantage** Netherlands
Blockchain Developer *July 2020 - Dec. 2020*
 - **Monitoring System:** Develop an Illicit transaction detection system on cryptocurrencies single-handedly. Used JavaScript, Python and GO language. Tested the product for vulnerability and potential threats. Leveraged considerable amount of transnational data for optimum solution

PROJECTS

- **DCS-BBN:** Developed enterprise cloud storage solution based on Blockchain with six raid data backups with distributed systems, backed up by cryptocurrency DCScoin. Published research paper named, **Blockchain-Based Decentralized Cloud Storage** in *International Conference on Mobile Computing and Sustainable Informatics* by Springer
- **Flight Agent:** Using CNN, SVM, Q-Learning, DQN, and DDQN with Python Libraries developed agent which suggest user either to wait for the better future price or buy the ticket right away.
